## Aster - File de validation des candidats

Ce rapport lit les CSV de discovery V2, deduplique les strategies par profil complet, puis transforme les backtests en actions: valider mark/index, valider WS, revue microstructure, forward strict ou rejet. Il ne lance aucun backtest et ne trade pas.

Lecture: `validate_mark_index_first` et `validate_ws_quality_first` ne sont pas des validations de profit. Ce sont des controles de realisme. Une lane rentable mais non validee reste une piste, pas une strategie promouvable.
