Verdict honnete

Le ledger ne dit pas "prie pour le reel". Il dit: 2 lanes meritent de continuer en forward paper, plusieurs lanes doivent etre stoppees, et le total global reste fragile si le latent ouvert absorbe le PnL realise.

Regle: une lane est interessante seulement si elle combine PnL positif, PF correct, sample suffisant et latent contenu. Un bon symbole seul ne suffit pas.

Limites de preuve

Les totaux globaux additionnent des event_type qui peuvent se chevaucher, ils servent au diagnostic, pas a simuler un portefeuille reel unique.

Methode latent: latest_unmatched_state_per_event_type_and_symbol.

Ce rapport reste paper-trading only: aucun signal client, aucun ordre wallet.
