

# Aster — Politique RL des lanes

Dashboard converti et redessiné le 2026-09-21 — recherche-only, pas un signal de trading — généré 2026-09-21T21:13:15Z UTC

Politique offline type contextual bandit. Ce n'est pas encore un grand modele IA neuronal: c'est un moteur de decision statistique local qui apprend sur nos artefacts de backtest et applique un reward. Il penalise fortement les faux bons backtests: mark/index rejete, microstructure faible, OOS absent ou realite non validee. Il ne trade pas et ne cree aucun signal client.
