

Aster – File de validation des candidats

Dashboard converti et redessiné le 2026-09-21 – recherche-only, pas un signal de trading – généré 2026-09-21T21:08:01Z UTC

Ce rapport lit les CSV de discovery V2, deduplique les strategies par profil complet, puis transforme les backtests en actions: valider mark/index, valider WS, revue microstructure, forward strict ou rejet. Il ne lance aucun backtest et ne trade pas.

Lecture: validate_mark_index_first et validate_ws_quality_first ne sont pas des validations de profit. Ce sont des controles de realisme. Une lane rentable mais non validee reste une piste, pas une strategie promouvable.
